

AIKYA

BENGALURU, KARNATAKA

Plot Area: 4,800 sq ft

Built-up Area: 6,500 sq ft

Project Timeline: 2016 – 2019

Project Cost: INR 5,000 per sq ft

TECHNOARCHITECTURE, BENGALURU

Principal Architect: Rajesh Shivaram

Project Team: Deepak, Saswat, Niket, Kavya, D Mohammed Ali

This house based in south Bengaluru on a plot area of 4,800 sq ft, is a perfect representation of the design firm's ongoing interaction with the new language of tropical residential architecture. The residence is an evocative of simple design, open structures of times past, yet possesses a modern spirit which offers the contemporary comforts. The house conflates, rather than juxtapose indoor and outdoor spaces in a perfect harmony.

Natural light, waterbody and greens, make a strong presence of nature within the built form. The spaces flow freely into one another making spatial connection easy. Each space promises to offer refreshing views of either internal court, external lawn or the views surrounding the site.

On entering this south facing property, thematically reminiscent of the modern version of 'ANGKUL ANGKUL', which is used as much to isolate views of the property so as to protect the inhabitants. Once inside, the building occupies one portion of the large site area which in turn orients itself into a larger external courtyard which occupies the other half of the site. Visitors can enter directly into the landscaped area, highlighting the courtyard, while the waterbody in the north east corner is flanked by the landscaped lawn.

An elongated bridge in gray stone, extends past the perimeter of the outdoor living space linking the water body. On the eastern side of the ground floor, living and the dining areas overlook the garden and the waterbody. The living and dining spaces are designed as a single large area making the spatial connection free flowing yet they have their own needed privacy. The other spaces like kitchen, guest bedroom, deck and balcony, are designed contributing to the ordered flow of the property creating an air of space and tranquility.

The main staircase, designed as a part of the internal court, separates the public and semi-public spaces. More than just a functional design feature, the staircase is planned as an experiential space with the soft light coming in through the skylight. These stairs lead above to the first and second levels that hold the bedrooms and entertainment spaces, respectively. The family area has a small bridge leading to the pavilion on the eastern side. Creating an undisturbed space for entertainment and fun activities, a home theater, bar and the gym are positioned on the second floor so as to have privacy as well as protection from direct sunlight.

All the spaces are naturally directed inwards, utilizing the central indoor court as well as the external landscaped lawn to become focal points, underscoring the dramatic symbiosis between indoor and outdoor spaces. The material palette of the house is formed of wood, marble, white color, and some contrasting tints added via furnishings.

The façade framed in wooden windows and gray for balcony, highlights the external volume. Contemporary needs and the client's strict brief of no clutter home helped to frame the color palette of the house.

The design approach sensitive enough to blend essence of nature in the built form, creates memorable experiences and, lets man and nature age in harmony. This sums up design intent of Aikya house.

UNIQUE MATERIAL APPLICATIONS

Roofing: R.C.C

Cladding: IPAE from Aaren Intpro

Windows: Burma Teakwood

Tiles: Kito Ceramics

Lighting: Sourced from China

Color: Asian Paints

Sanitaryware: Toto from Intrend Marketing

Bath Fittings: Grohe India

Furniture: Life Master from China

Furnishing: Fab India

Carpets & Rugs: Jaipur Rugs

Hardware: Blum

Modular Kitchen: Higold Kitchen

Kitchen Sink: Franke

Ply: Peel ply from Aaren Intpro

Veneer: Walnut from Aaren Intpro

Laminates: Greenlam

Wooden Flooring: Solid wood walnut from Living Elements

Air Conditioning: LG from Engineering and Services

Marble: Grey William Marble from R K Marble, Jaipur

Artifacts: Purple Turtle

KEY CONTRIBUTORS

Structural: Harshnaryana M

Civil: Sagar Darshan Construction

Façade: Aaren Intpro

Landscape: Green Flash

MEP: Plumbtech Engineers

HVAC: Engineering and Services
