

FRAMED HOUSE

by Crest Architects

buildōfy®
made with love in India

“The building form was developed as an abstraction of cubes with planes extracted along different surfaces to produce an exquisite structure.”

Project Location : North Bengaluru, Bengaluru, Karnataka
Architectural Firm : Crest Architects

Principal Architect : Vikas MV, Vishwas Venkat
Project Team : Shreya R

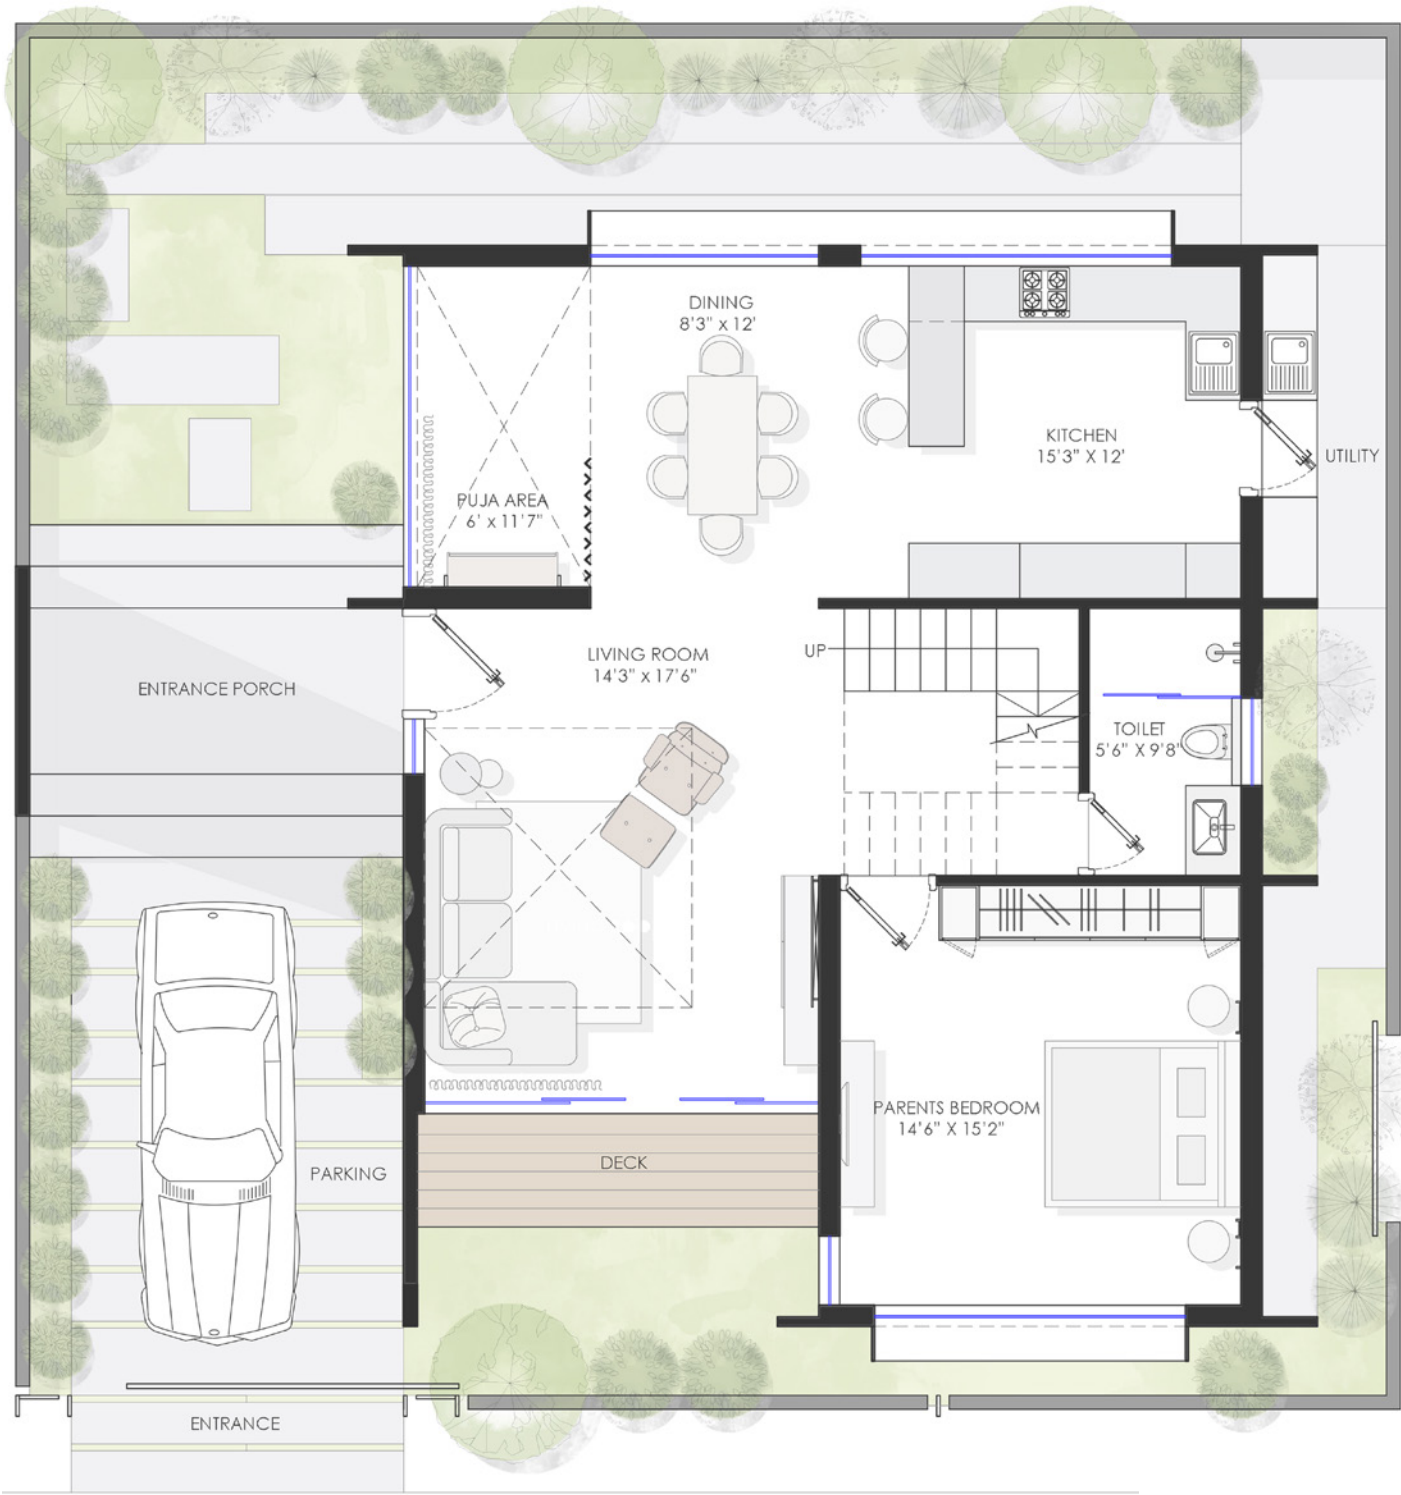

Plot Area : 2,500 sq. ft.
Plot Dimensions : 50’ x 50’
No. of Rooms : 3
No. of Car Parks : 1
Built-up Area : 2,300 sq. ft.
Timeline : Jun 2018 - Jun 2020
Facing : South West
Vastu Compliance : Yes

Site Context and Client Brief

Located within a gated community in North Bangalore, the square-shaped plot of this residence abuts the road on southern and western sides and enjoys views of the encompassing greenery. Based on the client's requirements, our approach was to design a modest house with a specific emphasis on natural light and ventilation.

Ground Floor

Spatial Planning

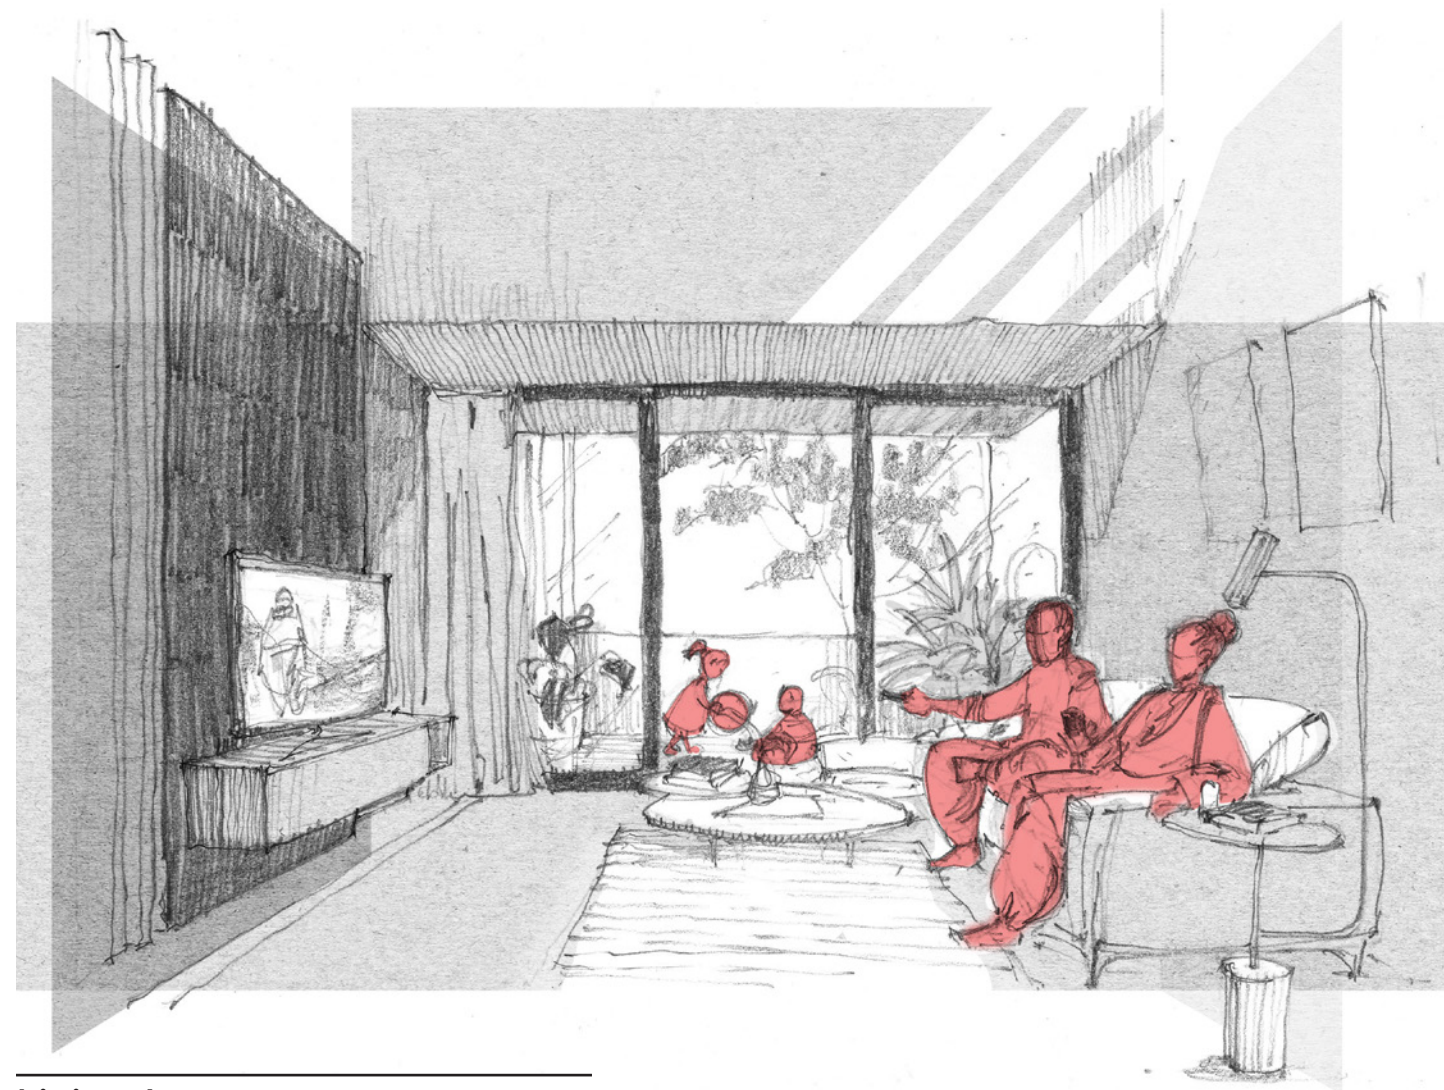

The design process and choice of materials for construction were influenced by a cost-effective budget. The approach was to create a compact layout that accommodated the requirements of the client while also establishing a sense of spaciousness to balance connectivity and privacy. The open floor plan that consists of a living, dining, kitchen, puja, and three bedrooms is spread across two floors. A semi-open puja adjoining the dinning has been designed with a sense of verticality to enhance the volume of the space.

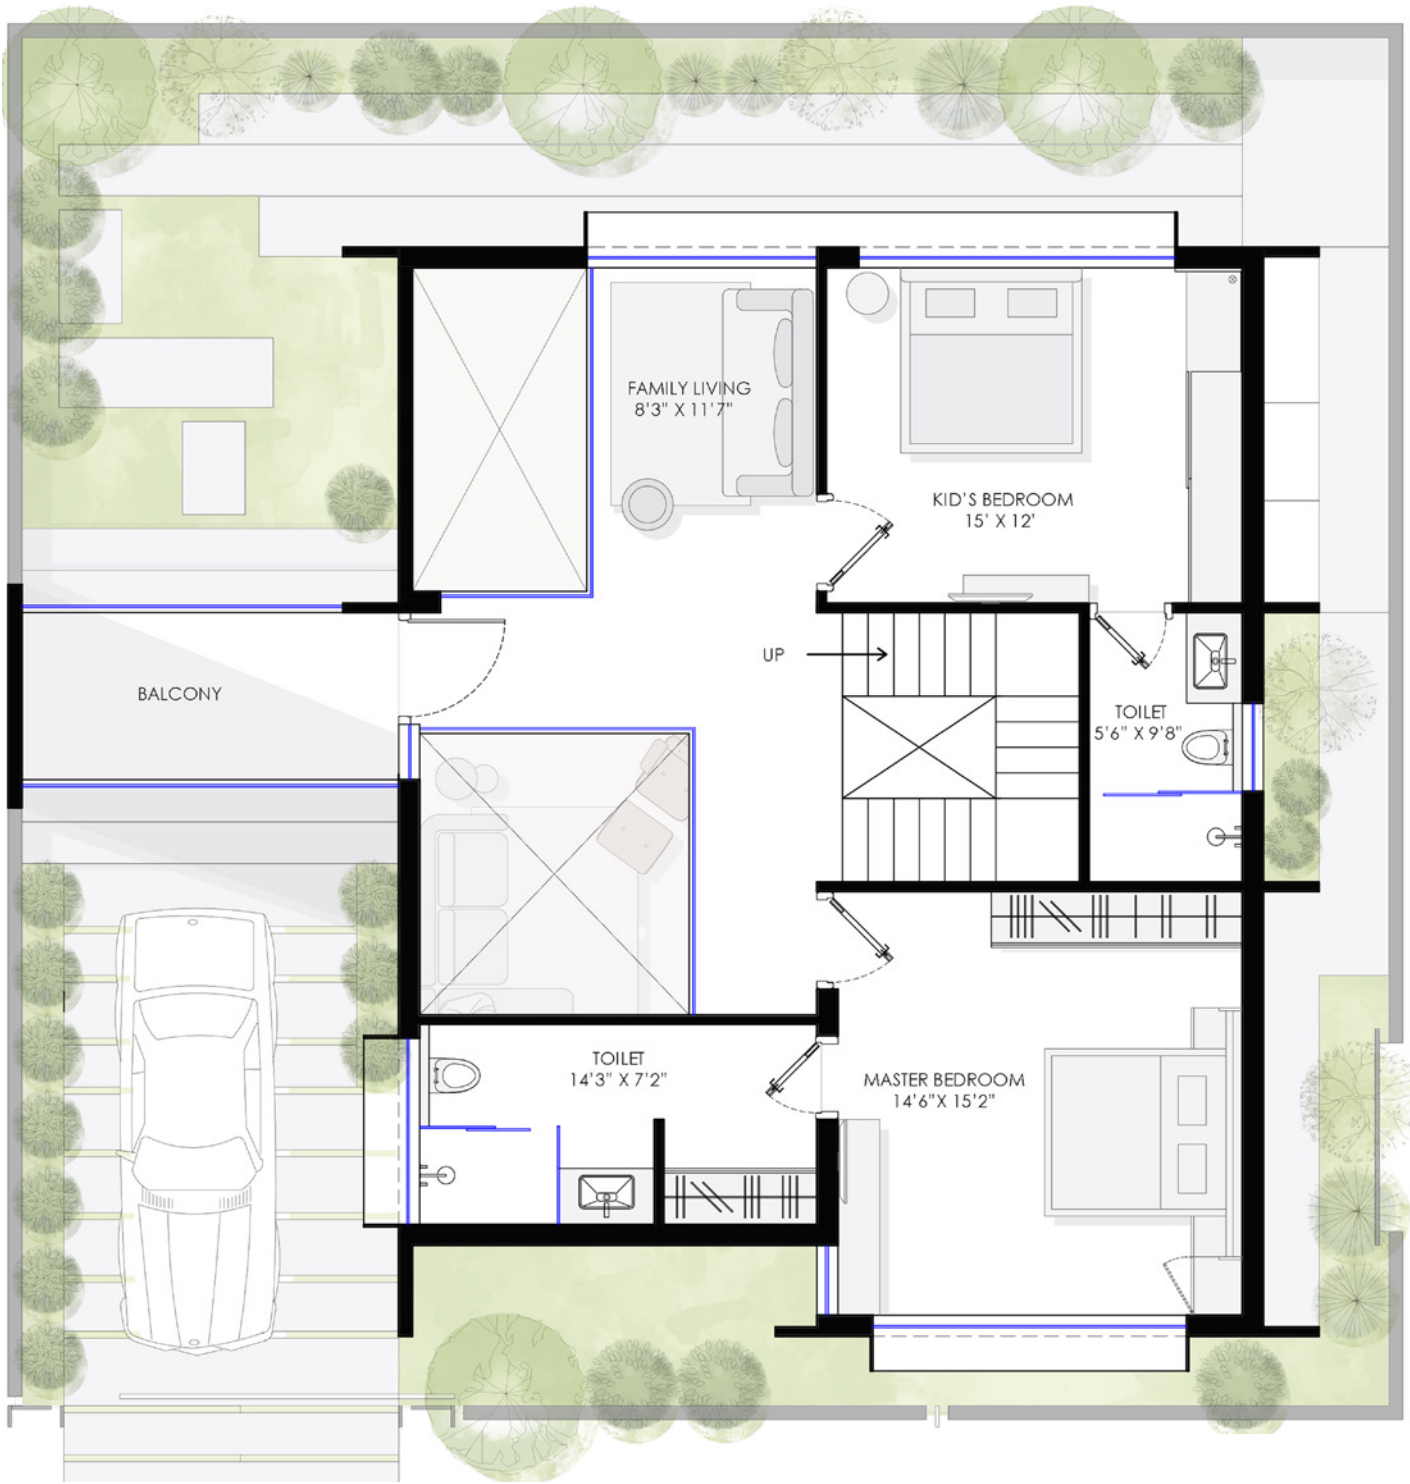

Wooden Deck

The rustic character and design language throughout the house is intended to be simple that reflect the lifestyle of the client.

Living Area

The double-height living and dining spaces are opened up to get a view of the landscaped garden and glazed skylights allow ample natural light to infiltrate the open scheme of the house.

First Floor

Interior Material Palette

The contemporary needs of the clients and the suburban setting of the property have been composed into a classic, clean-lined structure with solid wall surfaces and minimal openings. The blend of natural materials and rustic character reinforce the simple concept of the house. Warm wooden finishes along with neutral white plastered walls and exposed concrete soffits induce a subtle ambiance in the interior.

The Facade

The building form was developed as an abstraction of cubes with planes. The striking vertical masses harmonize with the surroundings and articulate the function of the house creating geometric elevations. Exposed concrete finish and white plastered walls are juxtaposed to form a subdued material palette for the exterior form. The southwestern façade was

kept almost entirely plain with narrow slit windows to avoid the harsh sun. These windows are accentuated with Sadahalli stone chajjas which frames compelling views of the surrounding landscape.

Section through the Staircase
The solid wooden railing wrapped round the central staircase adds a dramatic effect in the interiors.

Top - East Elevation
Bottom - North Elevation

Top - South Elevation
Bottom - West Elevation

Facade Finishes
01 / Exposed Concrete
02 / White Plaster and Paint

Flooring Materials
03 / Marble Flooring
04 / Wooden Flooring

Wooden Finishes
05 / Wall Cladding
06 / Partition
07 / Railing

Unique Material Applications

Windows:	UPVC
Tiles:	Kajaria
Lighting:	Lightwell, Hybec
Sanitaryware:	Grohe, Jaquar
Bath Fittings:	Jaquar
Furniture:	Urban Ladder
Furnishings:	Drapes World
Carpets and Rugs:	Carpet Kingdom
Veneer:	Indo Burma
Laminates:	Indo Burma
